June 17, 2014

Dear valued Contec® customer,

Please note, Contec is updating packaging, case labeling, and Safety Data Sheets (formerly MSDSs) for all solvents, presaturated wipes, and disinfectants to comply with the Globally Harmonized System of Classification and Labeling of Chemicals (GHS). These modifications will allow for an internationally standardized approach to hazard communication and classification.

Beginning in July, you will notice the following changes:

**PROSAT® *Sterile*™ Presaturated Wipes and PROSAT® Presaturated Wipes**
- New product labels
- Added artwork for proper bag opening
- Updated multilingual warning text with new pictograms

**Contec® Sterile 70% Isopropanol and Contec® Isopropanol**
- New multilingual product labels with bar code on the product

**SATWipes® Presaturated Wipes**
- New multilingual warning label

*Note: New labels will follow the current Contec color scheme. Teal represents sterile and blue represents non-sterile products.* ***Please note this is an artwork change only; products and packaging materials remain the same.***

**Updated Safety Data Sheets**
In compliance with GHS, Contec is designing a new Safety Data Sheet (SDS) format that includes an updated layout and significantly improved product information. It features GHS Pictograms, Signal Word, GHS Classification, Precautionary Statements, and Emergency Overview. Additionally, the NFPA and HMIS classifications are shown as well as the superseded Canadian WHMIS symbols.

To learn more about **GHS Regulations** go to: https://www.osha.gov/dsg/hazcom/ghs.html

SDS documents for our presaturated products and solutions will be available through our web site.
To view the most up-to-date Contec SDSs please visit: http://www.contecinc.com/msds.php

Should you have any questions, please contact your Contec Sales Representative or call Contec Customer Service at 1-800-289-5762 or +1-864-503-8333. We thank you for your continued commitment to Contec products.

Sincerely,

Pier de Jong
